SOLUTIONS TO ADVANCE HEALTH

Community Care Corps Team Members

Overview

Community Care Corps seeks to foster innovative models in which local volunteers will provide non-medical services to assist family caregivers, older adults, or persons with disabilities in order to live independently in their community.

Overview

Grantee will be funding innovative local models across the country for two major reasons:

- To increase the number of volunteer programs available at the local level to provide non-medical care to older adults, persons with disabilities, and their caregivers.
- To evaluate to determine which local models work best so that ultimately a national volunteer care corps could be developed.

Overview

- The Community Care Corps grant periods will be for 12 months with the possibility of adding up to 6 months as a ramp up period. Grants can range between \$30,000 and \$250,000 dollars.
- A wide range of non-profit and state and local government organizations are eligible to apply
